

Security Seals Range

Ensure your goods arrive safe, secure and free of tampering, every single time.

Security Seals have a wide range of uses in any retail or logistics business. Whether securing a crate or a shipping container, the Sekura Security Seal range will ensure your goods arrive intact and untampered with.

Security Seals are an effective means of deterring and detecting tampering. They help ensure your goods get to where they are going in the same state that they left. Using Security Seals helps reduce loss to your business, improve the safety and security of your goods in transit, and decrease the chances of your delivery being refused or rejected.

All of our Security Seals can be custom printed or stamped to include your company information, contact details, and branding. We can also supply Security Seals with sequential numbering, QR codes or barcodes, to make tracking and handling goods as easy as possible for you.

Custom Printing Options:

- Laser printing – high definition, suitable for metal, barcode compatible
- Foil hot stamping – good clarity, cost effective, simple logo designs
- Laser engraving/marking – cost effective, clear, logo and barcode compatible

Our printing or stamping techniques can be applied to all of the Sekura Security Seals – though some may come with more options than others – and custom colours are also available on most solutions upon request. We are also able to provide recycled and biodegradable materials to meet any of your environmental requirements as well as bespoke sizing on most lines. Custom orders may be subject to minimum order quantities.
