

The 2-Alarm EdgeTag™

The 2-Alarm EdgeTag gives great flexibility to both seal and protect all types of packaged items, including strapped merchandise, with 6 different cleat options which can be applied to the product at the store or DC before the tag is applied. To pull the EdgeTag away from the merchandise will cause it to alarm. A clear, thin conductive tape can also be used to create a barrier around the merchandise which cannot be broken without causing an alarm. To cut through the tape or cleat in order to open the box will cause the EdgeTag to alarm.

Features

- 2-alarm functionality
- Loud alarm if removed from box
- Compatible with S3 detachers
- 6 types of Detachable Cleat
- AM or RF technology
- Very low profile

The 2-Alarm EdgeTag™
