

MoveAlert - Wireless Merchandise Management

Reduce shrink, increase sales, & improve product availability - wirelessly.

The MoveAlert System is an innovative customer service and EAS solution that allows for open display while keeping associates alerted to product movement. The wireless solution triggers alerts to your associates through pager, headset, PA system, or other handheld devices, reducing theft, improving product availability and increasing sales through customer service activity.

SYSTEM COMPONENTS

MoveAlert IR Sensor

Positioned above merchandise and alerts when the detection field is entered. Designed use for low-weight, high-value, products such as lipsticks and other cosmetic accessories.

MoveAlert Tags

Credit card sized Motion Tags which alert when moved, tapped or tilted. The Contact Tag tells you when a display door is opened. Aides customer service as well as security.

MoveAlert Mat

A programmable wireless mat that sits on existing shelving, which will immediately alert you to a shelf sweep. Available in various sizes to fit your needs.

MoveAlert Hub

The Hub of the system communicates with all the devices on the system - also available is the Hub+, which uses cloudbased technology.
