

The SK AM Label™

Sekura SK AM Labels are compatible with all existing AM 58 KHz systems. Also available in miniature as Micro SK Labels and in non-deactivatable (NDL) format for varying applications. These high quality AM soft tags are excellent for instore labelling across a wide range of applications – especially smaller high-end items, which have a high loss rate and are difficult to tag.

Features

- Self-adhesive for all types of surfaces
- Can be deactivated at the cash point
- Compatible with all AM 58 KHz systems
- Micro SK Labels are only 1.5 mm thick
- Sew-in variant for clothing available
- Also available in other colours
