

jarloc®

Jarloc® is a standalone, reusable security device, specially designed to protect traditional shaped glass jar candles. Jarloc® fits snugly in the top of the jar without damaging the wick, providing benefit denial as well as RF or AM EAS detection at the exit. With Jarloc® you can display your glass jar candle merchandise with confidence; it will not undermine the sensory experience, or impact the visual appeal of candles on the shelf. Jarloc® will help you increase your on-shelf availability, driving sales whilst reducing shrink. Adding “Jarloc® Security Protected” labels improves results even further.

A magnetic detaching version of the Jarloc® is currently under development too, so look out for more details or email sales@sekura-global.com to be kept up to date with the latest availability information.

Features

- Specialist non-absorbent material prevents cross contamination of fragrance
- Detach at POS with exclusive detacher
- Reusable and easy to use
- Dual Frequency – AM and RF technology
- Designed to allow the candle fragrance to accumulate in the lid as normal
- Enhanced results achieved with Jarloc® labels
