

The ShrinkWrap Sleeve™

The ShrinkWrap Sleeve™ has been developed to protect small and hard to tag merchandise, such as cosmetics. The one-piece design aids rapid application in a single action, using a desktop heat tunnel – either in your back-of-house, at your Distribution Centre, or at source. Compatible with existing AM 58 KHz and RF 8.2MHz systems, as well as with RFID upon request, the patent-pending Sekura ShrinkWrap Sleeve™ is exclusive to Sekura Global.

The Micro SK Label in the AM version is even smaller than the average tag, which allows your branding to remain as visible as possible while still enjoying greatly enhanced security.

Features

- Deactivated at POS
- Built-in black Micro SK AM tag or RF Cosmetic Label, as required
- One piece, all-in-one, construction
- Ensures compliance
- Protects the integrity of your merchandise
- Other sizes available on request
- RFID solutions available upon request
- Leaves no residue behind upon removal
- Patent-pending
