

The AM Universal Controller™

The Sekura Global AM Universal Controller brings revolutionary new technology to EAS. This controller can be used for all Sekura systems (pedestals, door loops, floor loops, or wings) and can also be used as a cost-effective solution for any AM pedestal system where the existing controller has become defunct.

Features

- Auto-tune allows the system to be configured with a single button press
- Up to 16 controllers may be connected together on a single network
- Advanced configuration using a laptop computer connected locally via a built in Ethernet connection or remotely over a networked connection
- Virtually eliminates false alarms due to built-in Signal Jammer and “Tag Too Close” detection
- Connect up to three antennas to one controller
- Zonal alarm and relay mapping
- Built-in Alarm & Event Log provides time and date of the last 200 alarm events
- Built-in visual synchronisation tool
- Compatible with AC power requirements anywhere in the world
- Multi-Aisle or Wide-Aisle Capability – by adding antennae, the system can protect any exit configuration

The AM Universal Controller™
