

The BoxGrip SR™

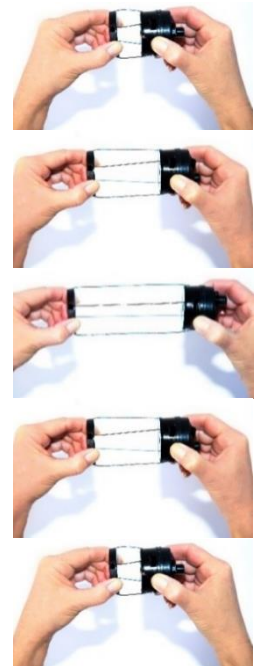

The self-retracting BoxGrip SR™ is spring-loaded for rapid application and removal. Its unique recoil function saves 59.5% of time spent tagging and detaching on the shop floor, when compared to standard wrap devices – not to mention the untold hours wasted untangling cables after removal, an issue that the BoxGrip SR eliminates entirely. The versatile 39” cable length allows most boxes to be wrapped with this single solution.

The unique “warning beep” feature on the 3 alarm version serves both to alert store personnel and to save embarrassment for genuine customers, emitting a warning as the BoxGrip approaches the EAS barriers, allowing time to retreat before it alarms fully.

Features

- Fast and easy application
- 7x7 aircraft grade cables self-tighten
- No tangles – retracts immediately
- Press-button lock and release
- Long lasting, replaceable battery
- Opens with standard, Superlock and S3
